# PUBLIC DEBT MANAGEMENT: ISSUES AND SOLUTIONS

NEW

## COURSE OUTLINE

As the global economy comes to terms with the impact of the global financial crash, the threat of a new debt crisis has taken centre stage. This is compounded by the fact that borrowing has rapidly increased as countries seek to boost investment in infrastructure to support their objectives under the Sustainable Development Goals.

New borrowing sources include Eurobonds and emerging creditors such as China. Analysts have warned that global debt has reached an "all time high" as more countries than ever are in danger of slipping into a major debt crisis. Governments need to address these challenges in order to manage costs and risks within a sound macro and fiscal framework.

This course will take participants through the fundamental principles of public debt management, taking current developments into account, and will explore the latest tools to manage their debt portfolios effectively.

**COURSE OBJECTIVES:** On completion, you will be able to:

- Understand the scope of public debt management and its linkages with fiscal and monetary policy
- Understand debt concepts and the role of domestic financial markets
- Analyse the strengths and weaknesses of debt management operations in your country
- Apply concepts of cost and risk to your public debt portfolio to manage both in line with your country's debt management objectives
- Create an outline of a debt management strategy based on a portfolio review and a good understanding of the objectives for debt management
- Appreciate the impact on public debt management of emerging lenders and lending arrangements

## KEY TOPICS
